Imran Shahadat

Lahore, Pakistan | imranali.13imran@gmail.com | 0305 6151224 | LinkedIn | GitHub

Professional Summary

Results-driven Senior Backend & Full-Stack Developer with over 10 years of experience specializing in Node.js, PHP, and Java. Expert in designing, building, and scaling high-performance RESTful APIs, distributed microservices architectures, and robust cloud deployments. Proven track record of leading technical teams, driving operational excellence, and delivering globally scalable solutions that meet international standards. Adept at optimizing complex databases, implementing strict security protocols, and establishing CI/CD pipelines to ensure 99.9% uptime and accelerated delivery cycles.

Professional Experience

Mindbridge – Senior Backend Developer / Team Leader
Lahore, Pakistan
Sep 2023 – Present

- Architected and scaled backend systems and RESTful APIs using Node.js, PHP, and Java, successfully serving 50,000+ daily active users globally
- Led the transition to a microservices infrastructure, achieving 99.9% system uptime and enabling seamless horizontal scalability across distributed cloud networks
- Optimized complex MySQL, PostgreSQL, and MongoDB queries, reducing average API response times by 40%
- Established and enforced rigorous security protocols, including JWT/OAuth authentication and advanced encryption, maintaining a record of zero security breaches
- Streamlined DevOps processes by deploying applications via Docker and GitHub Actions CI/CD pipelines, cutting deployment times by 60%
- Managed a cross-functional team of 8 developers, leading code reviews, enforcing best practices, and mentoring junior engineers through pair programming
- Wrote and maintained comprehensive test suites using Jest and Mocha, sustaining 85%+ code coverage across all core services

Vaival Technologies – Senior Software Engineer
Lahore, Pakistan
Jan 2018 – Aug 2023

- Developed and maintained enterprise-level web applications, focusing on backend performance and seamless third-party integrations
- Collaborated with international stakeholders to gather requirements and translate business logic into scalable technical solutions
- Migrated legacy monolithic applications to modern, scalable frameworks, improving maintainability and reducing server costs by 20%

black box technology – Backend Developer
Lahore, Pakistan
Jun 2014 – Dec 2017

Technical Skills

Backend Languages: Node.js, PHP, Java, Express.js, NestJS, Laravel

Architecture & APIs: RESTful APIs, GraphQL, Microservices Architecture, System Design, Swagger/OpenAPI

Databases: MySQL, PostgreSQL, MongoDB, Redis, Schema Design, Query Optimization, Migrations

Authentication & Security: JWT, OAuth 2.0, Data Encryption, Access Control, CORS, Rate Limiting

DevOps & Cloud: AWS (EC2, S3, Lambda), Docker, CI/CD Pipelines (GitHub Actions, Jenkins), Git, Linux

Testing & Tools: Unit/Integration Testing (Jest, Mocha), Postman, VS Code, Jira, n8n, Make

Education

Bachelor of Science in Computer Science – Virtual University of Pakistan

Intermediate in Computer Science (ICS) – Board of Intermediate and Secondary Education, Lahore

Certifications

Web Development Certification – Nevtech • **Web Development Certification** – PNY
